

Standard or Custom Chemistries.

 **Metalwerks** PMD, Inc.
High-Tech Melting & Processing of Specialty Metals

Medical Bone Plate Materials

Obtaining the ideal starting material can sometimes be a challenge for both technical and purchasing. Metalwerks has overcome these obstacles by understanding these needs. When processing the material, all aspects of the product are taken into account including microstructure, mechanical properties, surface finish, camber, and flatness. The tight dimensional tolerances eliminate any machining difficulties while the metallurgical aspects of the material ensure product performance. Metalwerks specializes in understanding not only the specification but what the customer wants.

Plate, Sheet or Strip:

- CP Ti
- Ti-6Al-4V
- Ti-6Al-4V ELI
- Ti-6Al-7Nb
- Ti-15Mo
- Ti-3Al-2.5V
